SUMMARY: A strong academic foundation in Computer Information Systems and Cybersecurity skilled in a wide range of technologies including Python, R, SQL, and Excel, with hands on experience in developing data driven applications using machine learning techniques. Experienced in software and security testing, database management, and technical documentation. Bilingual in English and Spanish, with proven problem solving abilities, critical thinking, and a collaborative mindset honed through academic research and customer facing roles.

EDUCATION

Kean University *Union, NJ*

Master of Science, Computer Information Systems *May, 2024 – May, 2025*

Bachelor of Science, Computer Science Cyber Security *September, 2020 – May, 2024*

TECHNICAL SKILLS

Core Technical Skills: R-Studio, Python, Excel, JavaScript, Html, Css, Php, Java, C++

DBs & Content Management: SQL, MySQL, Contentful, Restful API, Firebase

Methodologies & Tools: Agile SDLC, Jira, Software Testing, Security Testing

Other Skills : Problem Solving, Critical Thinking, Bilingual (English & Spanish), Team Collaboration, Time Management

PROFESSIONAL EXPERIENCE

Kean University - Union, NJ *September, 2024 - May, 2025*
Research Assistant Remote

- Developed a responsive web app using Python's Streamlit library to enable access to our research Q-RSAR model for chemical and biological analysis.
- Applied ML techniques to build and optimize the QSAR/Q-RASAR model for drug discovery and chemical property prediction.
- Collaborated with researchers to align model development with research goals and presented findings to the scientific community.
- Remained current with emerging ML and QSAR/Q-RASAR methodologies.

Google Kean University - Union, NJ *Jan, 2024 - May, 2024*
Researcher Remote

- Implemented data quantization techniques for optimization by reducing data numerical precision and speed up training.
- Developed a prototype for optimizing algorithms and systems using quantization techniques in distributed machine learning training on large datasets.

Inmotion MRG - Newark, NJ *June, 2023 - current*
Retail Sales Associate AWR Newark, NJ

- Respond to a broad spectrum of technical inquiries, encompassing software applications and hardware troubleshooting, to elevate customer understanding and facilitate informed decision-making.
- Maintained up to date knowledge of inventory levels and managed shelf stocking.
- Provided expert guidance to customers in selecting the latest technology gadgets and accessories, ensuring satisfaction and optimal product fit.
